

DOUBLE DOOR ICE COOLERS

Ice coolers are designed for secure outdoor storage and merchandising bagged ice at convenience stores, gas stations, campgrounds, marinas, and event venues. Built with heavy-duty insulated panels, these units help maintain freezing temperatures while protecting ice from sun exposure and melting.

Available in Single Door and Double Door configurations, Smart Air & Smart Box ice coolers provide durable construction, reliable temperature retention, and convenient customer access for high-traffic retail environments.

Ice Cooler – Double Door

Application: Outdoor Bagged Ice Storage

Temperature Range: Maintains frozen bagged ice

Cooling Method: Passive Insulated Storage

Construction: Insulated Steel Cabinet

- ❖ Large storage capacity for high-volume ice sales.
- ❖ Heavy-duty insulated cabinet reduces ice melt.
- ❖ Lockable doors for security after business hours.
- ❖ Designed for outdoor commercial environments.
- ❖ Durable construction for daily high-traffic use.
- ❖ Smooth interior for easy cleaning and sanitation.
- ❖ Weather-resistant exterior finish.
